STATE ACTION
Governor's Office of Planning and Budget
116 State Capitol, SLC, UT 84114
Phone: (801) 538-1535 Fax: (801) 538-1547

1. Administering State Agency: Division of Oil, Gas and Mining 1594 West North Temple Suite 1210 PO Box 145801 Salt Lake City, Utah 84114-5801	2. State Application Identifier Numbers: (assigned by State Clearinghouse) 3. Approximate date project will start: Expanding an existing small mining operation (< 5 acres), to a large mining operation.
4. Areawide clearinghouse(s) receiving State Action: (to be sent out by agency in block 1) Russell Cowley Six County Commissioners Organization 250 North Main P.O. Box 820 Richfield, Utah 84701	
5. Type of action: <input type="checkbox"/> Lease <input checked="" type="checkbox"/> Permit <input type="checkbox"/> License <input type="checkbox"/> Land Acquisition <input type="checkbox"/> Land Sale Land Exchange Other	
6. Title of proposed action: Large Mining Operations - H. E. Davis Construction, Inc. , Levan Gypsum Mine	
7. Description: <p>During Operations: Gypsum will be mined by open pit, benched excavation methods. Suitable plant growth (soil) material overlying the gypsum deposit will be salvaged for final reclamation. Approximately 900 cubic yards per year will be stockpiled and protected. Typical drilling and blasting techniques will be used to remove the gypsum from the deposit. Trackhoes and loaders will load the material into haul trucks, which will then be transported to the processing area. Approximately 100,000 cubic yards of gypsum will be mined each year. All material mined from the deposit will be consumed and no tailings will be generated. A portable jaw crusher and screen plant will size the gypsum into fines, -2 inch and -6 inch products. The sized material will be placed in stockpiles, loaded onto transport trucks and hauled to offsite markets. Safety berms will be maintained above highwalls and along haul roads. Two temporary diesel fuel tanks will be kept on site. All fuel and lubricants will be placed in plastic lined bermed areas to retain any spills. Some concurrent regrading work will occur during mining operations.</p> <p>After Operations: The entire mining operation will be reclaimed. The final mine excavation will consist of eight benches, each 40 feet high and 20 feet wide. Compacted areas will be ripped and all areas will be covered with 6 inches of soil material. Stockpiled soil material will be tested and amended with 10 tons/acre of composted manure if necessary. All areas will be hydro-seeded or hand broadcasted with an approved seedmix. The eight 20-foot wide benches will be covered with 6" of topsoil, seeded and then raked.</p>	
8. Land affected (site location map required) (indicate county) Portions of the SE1/4 and SW1/4 of Section 33, Township 14 South, Range 1 East, SLBM, Juab County, Utah	
9. Has the local government(s) been contacted? Yes, by copy of the notice. Glenn Greenhalgh, Juab County Planning and Zoning	
10. Possible significant impacts likely to occur: None	
11. Name and phone number of district representative from your agency near project site, if applicable: N/A	
12. For further information, contact: Tom Munson , Senior Reclamation Specialist Phone: (801) 538-5321	13. Signature and title of authorized officer: <div style="text-align: center;">  Permit Supervisor </div> Date: 12/9/2002
